Summary

ID	Severity	Defect	Type
BUG-001	medium	Very long URL path returns HTTP 500 instead of a 404	Functional
A11Y-BUG-01	critical	Buttons must have discernible text (button-name)	Accessibility
A11Y-BUG-02	serious	Elements should not have tabindex greater than zero (tabindex)	Accessibility

BUG-001 MEDIUM Very long URL path returns HTTP 500 instead of a 404

Confirmed app defect · Requirement BBC-004 · test e2e/errors-articles.spec.ts:21 · Environment: Chromium 1280x800, https://www.bbc.co.uk

DESCRIPTION

Requesting a page whose path is about 1,500 characters long makes the server fail with a 500 error. A path of 300 characters correctly returns the 404 page. A visitor or crawler hitting an over-long link sees a server error instead of a friendly not-found page.

HOW TO RECREATE

1. Open a browser and go to https://www.bbc.co.uk/ followed by a path of about 1,500 characters, for example /qa- then 1,500 letter a's.
2. Look at the response status (browser dev tools, Network tab) and the page shown.
3. Repeat with a path of 300 characters and compare: that one returns the normal 404 page.

TEST DATA

path	/xxxxxxxxxxxxxxxxxxxxxxxxxxxxxx… (1501 chars)
rule	Not-found or client error, never a 5xx

Expected	Actual
A 4xx status (404 or 414) and the normal not-found page.	HTTP 500.

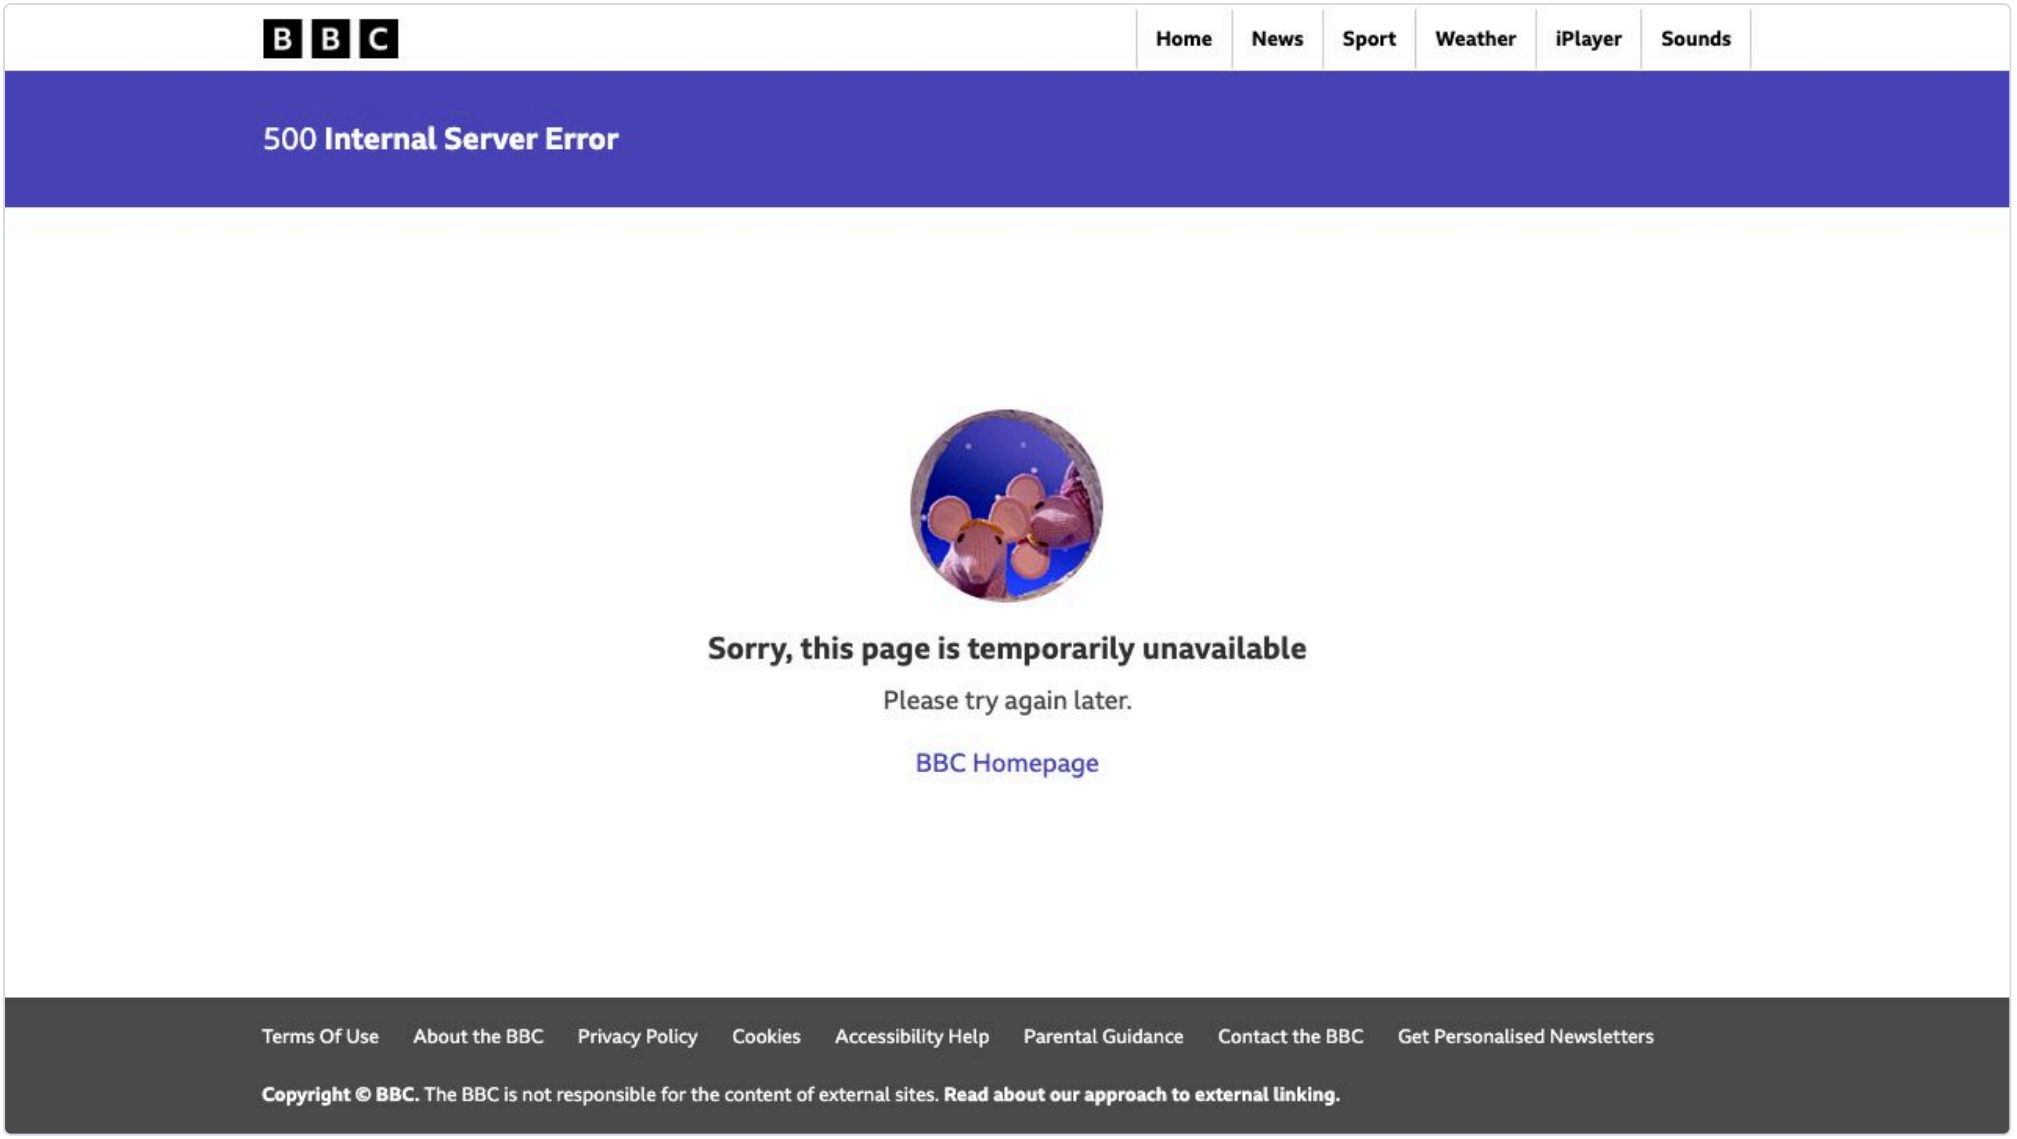

TEST FAILURE MESSAGE

```
Error: expect(received).toBeLessThan(expected)

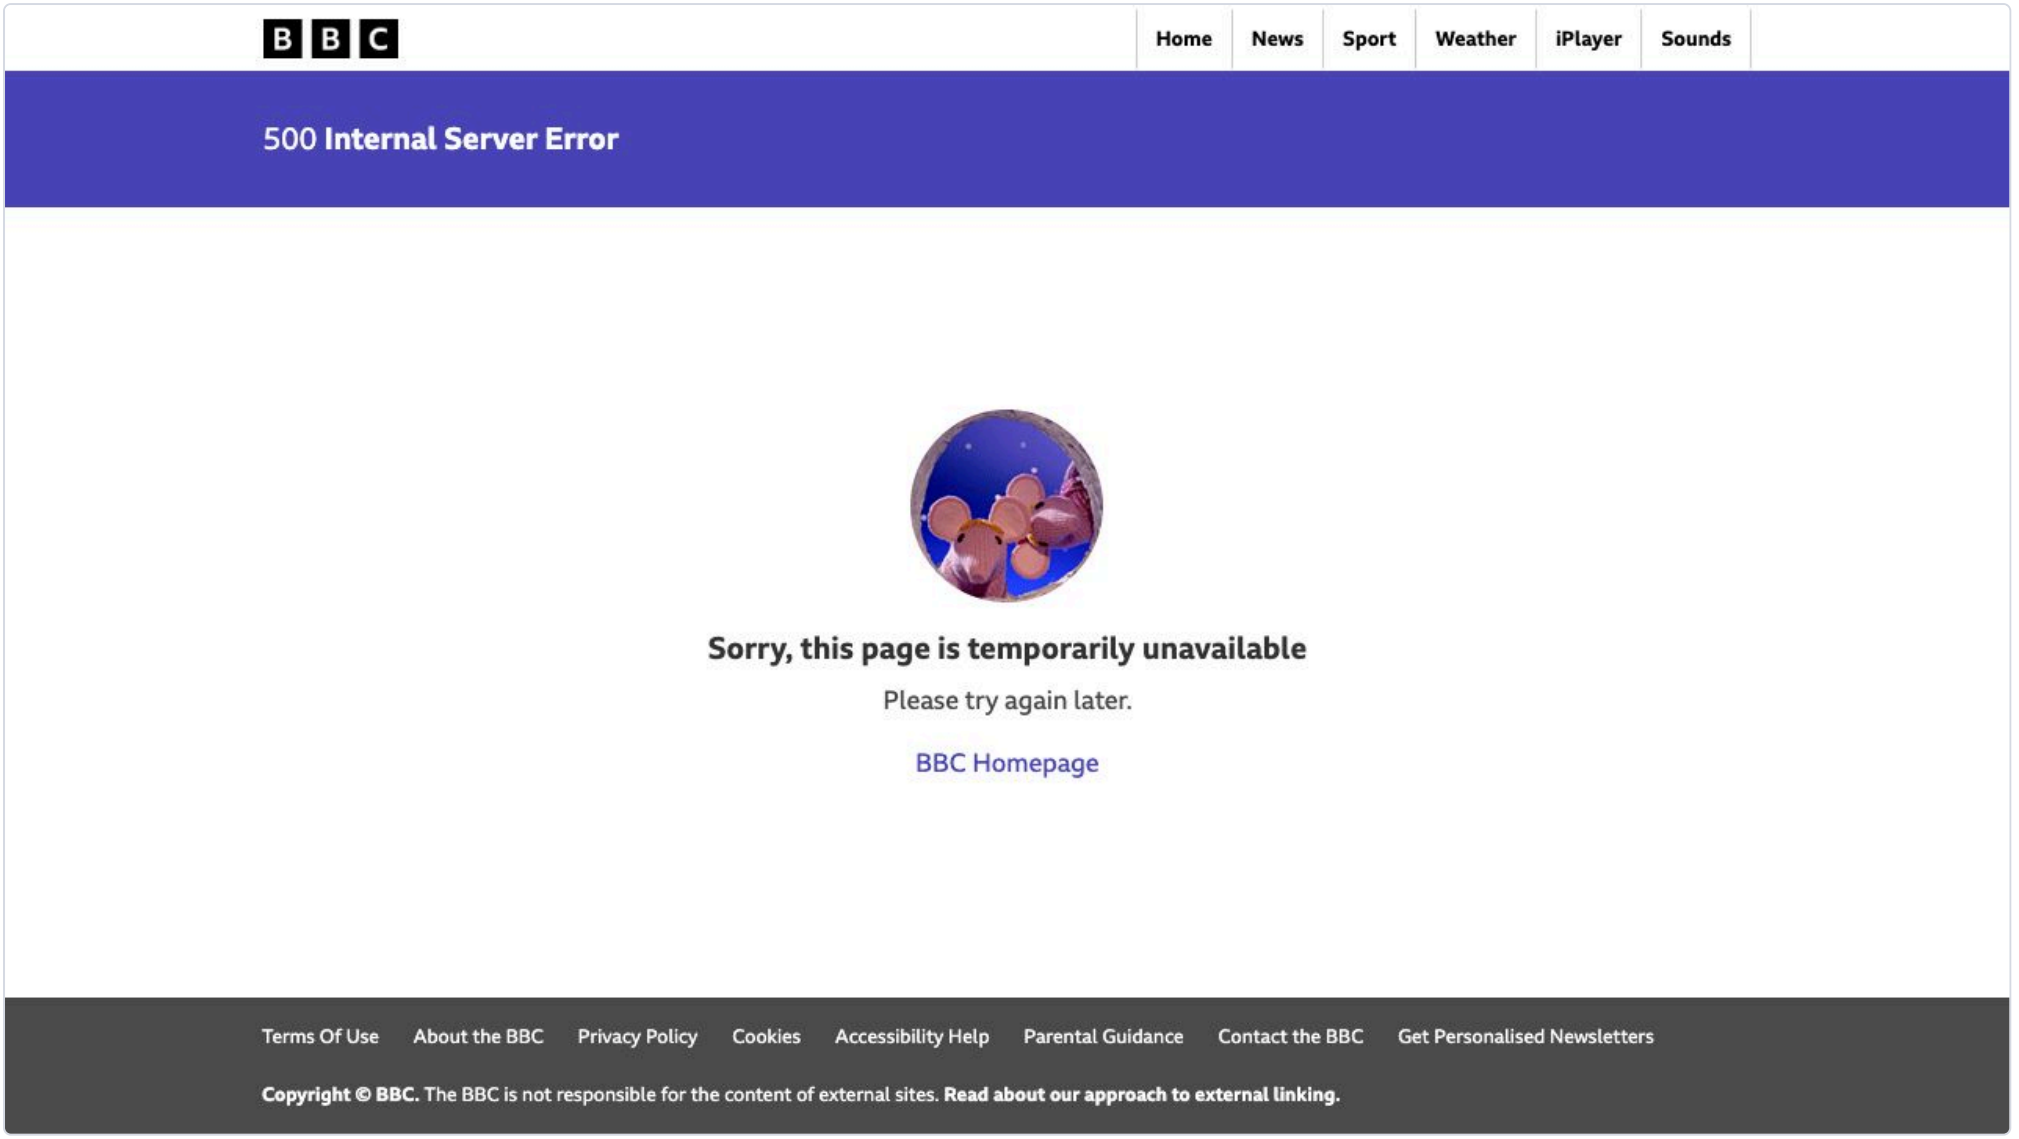

Expected: < 500
Received:   500
```

SCREENSHOTS AND EVIDENCE

Step 1: Open the odd URL

Step 2: Status is below 500 and the page is readable

A11Y-BUG-01 CRITICAL **Buttons must have discernible text (button-name)**

Confirmed app defect · Requirement A11Y-005 · test a11y/pages.spec.ts:20 · Environment: Chromium 1280x800, https://www.bbc.co.uk

DESCRIPTION

Ensure buttons have discernible text. Found on: Page not found. Example elements: button. Guidance: https://dequeuniversity.com/rules/axe/4.14/button-name?application=playwright

HOW TO RECREATE

1. Open Page not found on https://www.bbc.co.uk.
2. Run the axe browser extension (or @axe-core/playwright) on the page.
3. Find rule button-name in the results and inspect: button.

TEST DATA

route	/qa-this-page-does-not-exist
standard	WCAG 2.2 AA + best practices

Expected	Actual
The element meets WCAG and axe rule button-name.	axe reports a critical violation.

TEST FAILURE MESSAGE

```
Error: Accessibility violations on "Page not found"

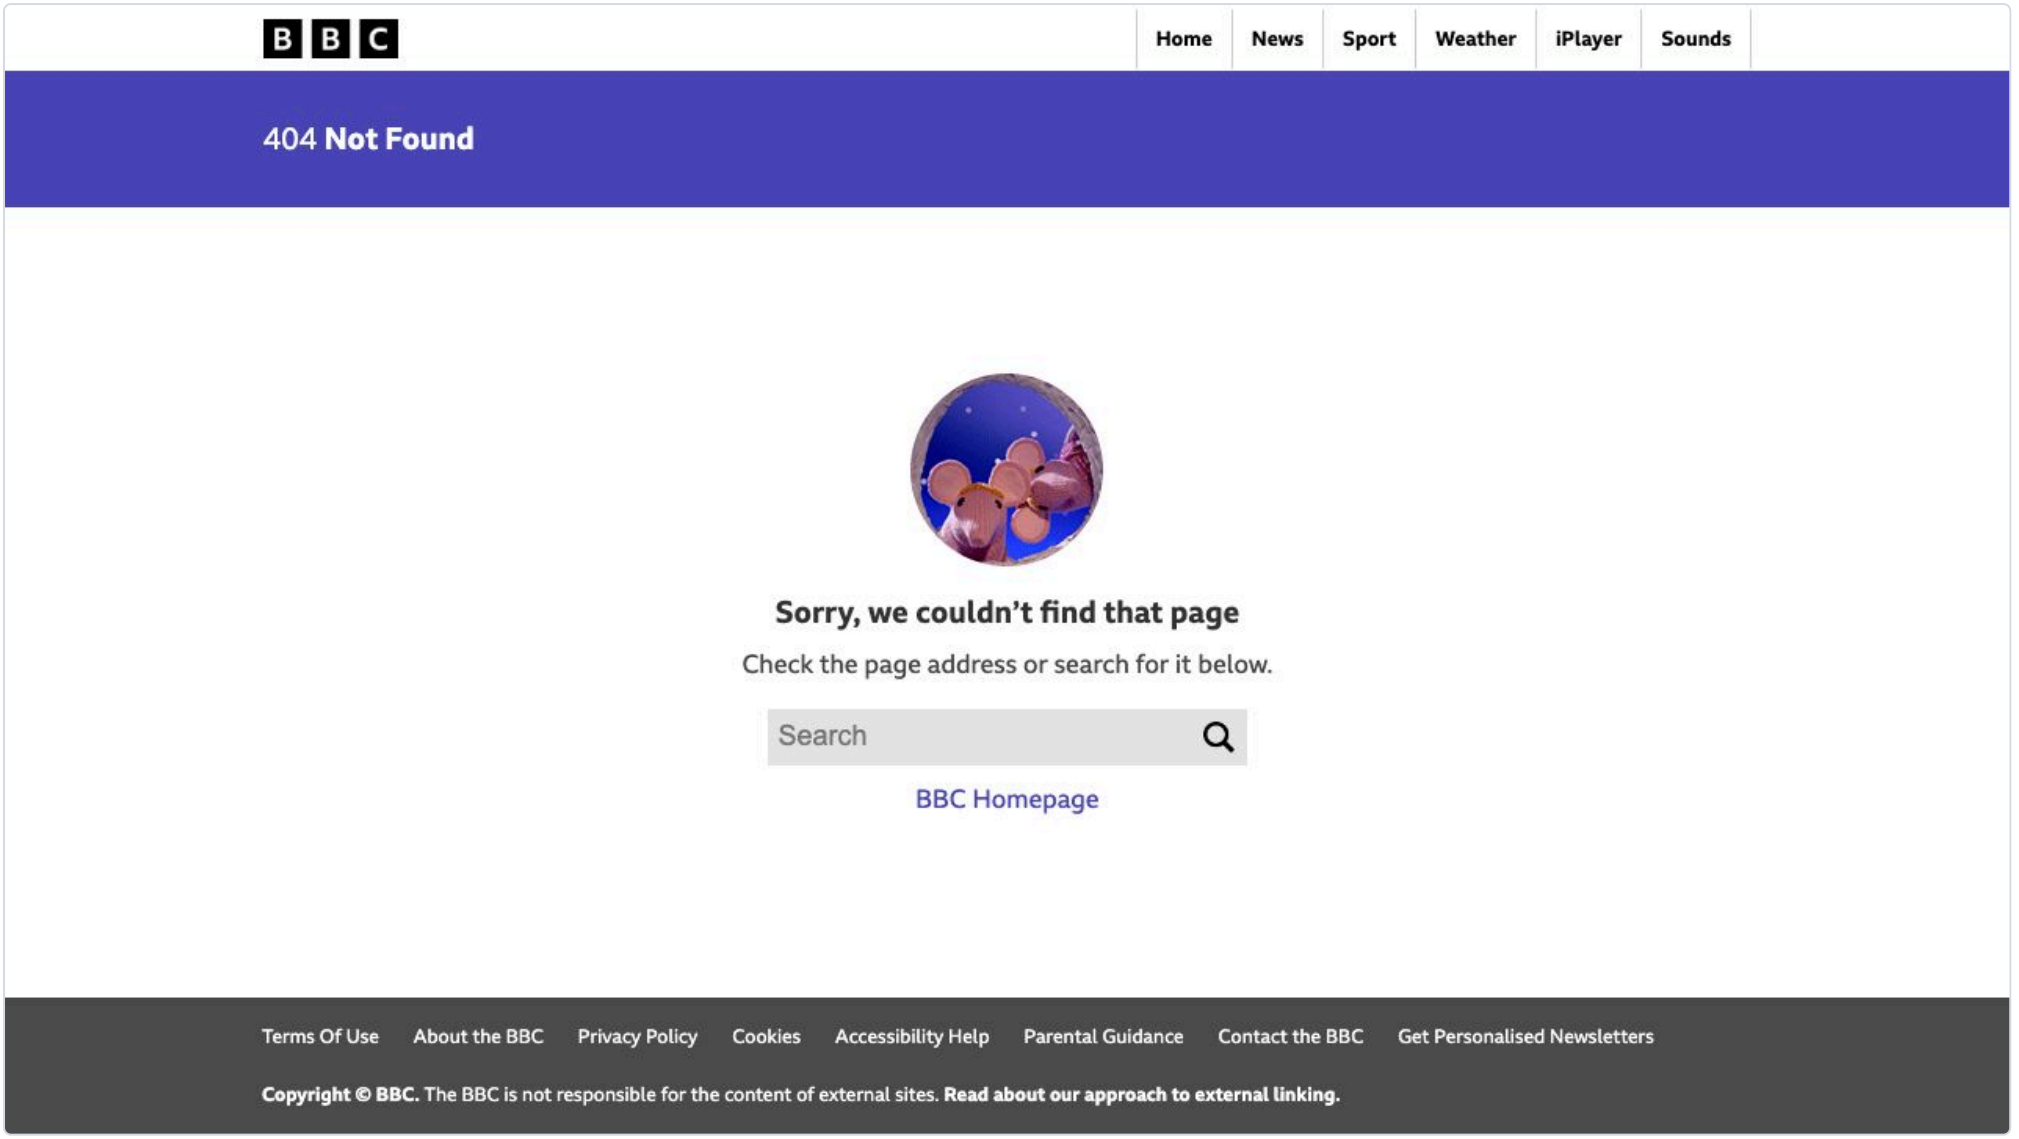

expect(received).toEqual(expected) // deep equality

- Expected  - 1
+ Received  + 6

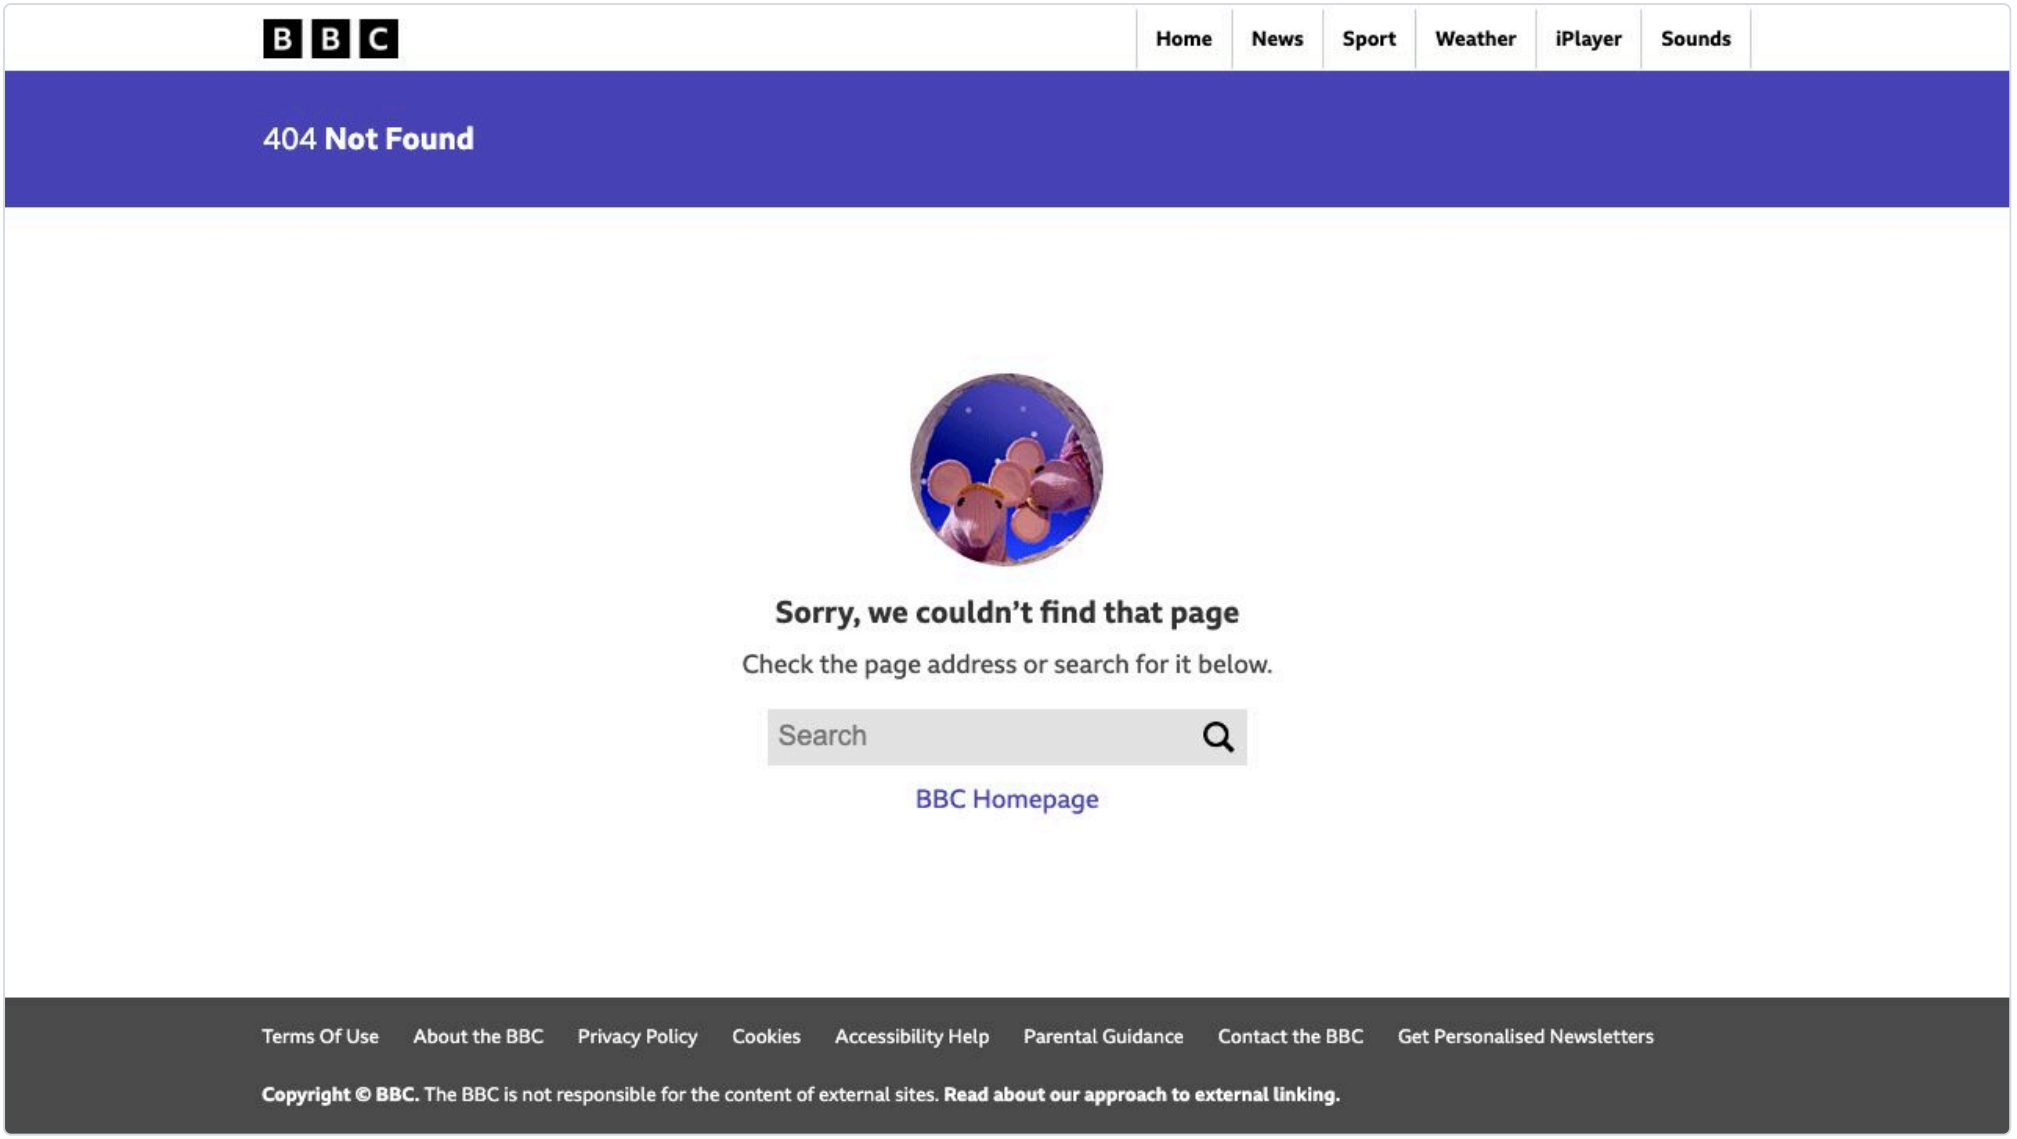

- Array []
+ Array [
+   "button-name (critical): 1 element(s)",
+   "landmark-one-main (moderate): 1 element(s)",
+   "region (moderate): 7 element(s)",
+   "tabindex (serious): 19 element(s)",
+ ]
```

SCREENSHOTS AND EVIDENCE

Step 1: Open Page not found

Step 2: Scan Page not found with axe

A11Y-BUG-02 HIGH Elements should not have tabindex greater than zero (tabindex)

Confirmed app defect · Requirement A11Y-005 · test a11y/pages.spec.ts:20 · Environment: Chromium 1280x800, https://www.bbc.co.uk

DESCRIPTION

Ensure tabindex attribute values are not greater than 0. Found on: Page not found. Example elements: .logo > a[href$="bbc.co.uk/"]; .dark-blue. Guidance: https://dequeuniversity.com/rules/axe/4.14/tabindex?application=playwright

HOW TO RECREATE

1. Open Page not found on https://www.bbc.co.uk.
2. Run the axe browser extension (or @axe-core/playwright) on the page.
3. Find rule tabindex in the results and inspect: .logo > a[href$="bbc.co.uk/"]; .dark-blue.

TEST DATA

route	/qa-this-page-does-not-exist
standard	WCAG 2.2 AA + best practices

Expected	Actual
The element meets WCAG and axe rule tabindex.	axe reports a serious violation.

TEST FAILURE MESSAGE

```
Error: Accessibility violations on "Page not found"

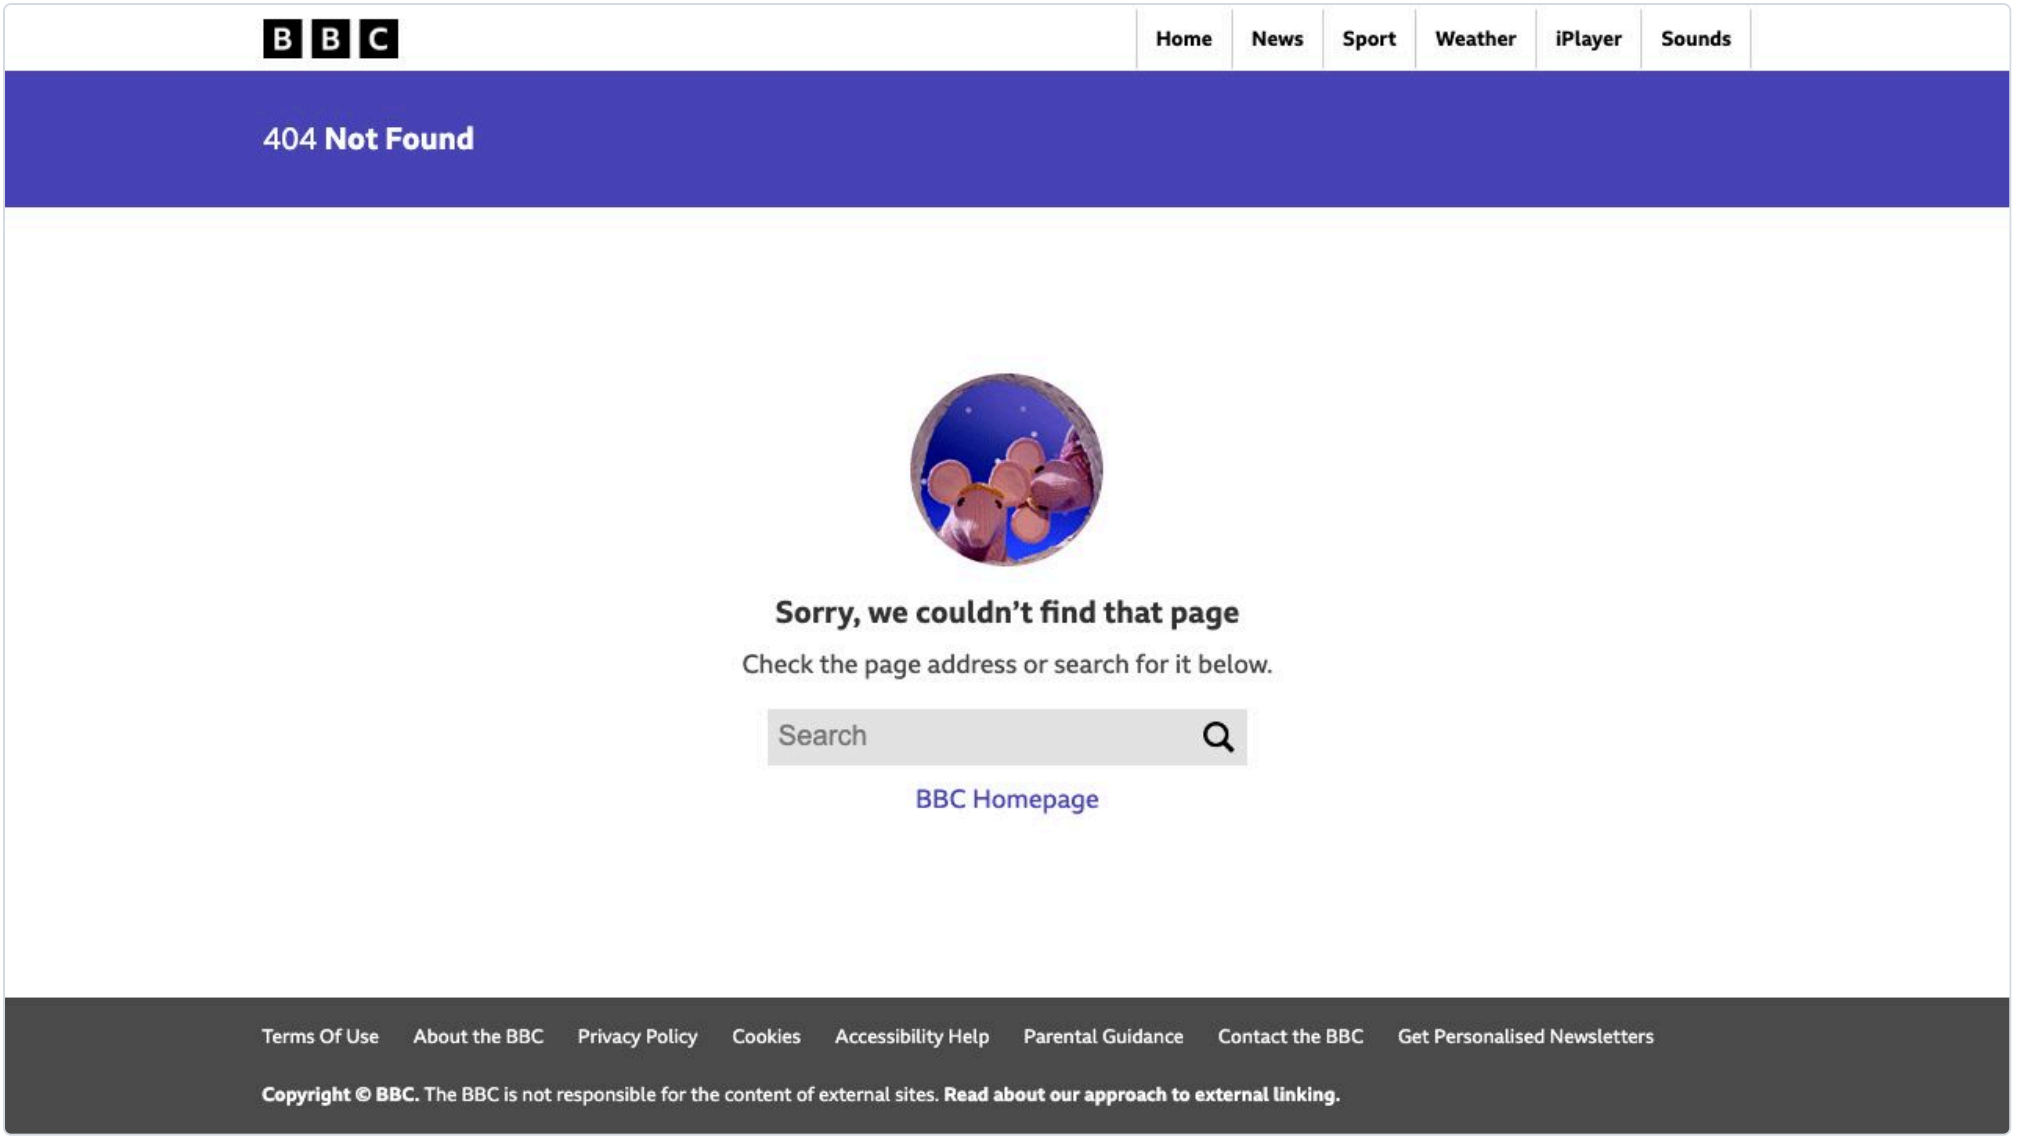

expect(received).toEqual(expected) // deep equality

- Expected  - 1
+ Received  + 6

- Array []
+ Array [
+   "button-name (critical): 1 element(s)",
+   "landmark-one-main (moderate): 1 element(s)",
+   "region (moderate): 7 element(s)",
+   "tabindex (serious): 19 element(s)",
+ ]
```

SCREENSHOTS AND EVIDENCE

Step 1: Open Page not found

Step 2: Scan Page not found with axe
